## Notes to the consolidated financial statements For the half-year ended 31 December 2017

### 1. Corporate Information

Macquarie Telecom Group Limited is a for-profit company limited by shares incorporated in Australia whose shares are publicly traded on the ASX (ASX Code: MAQ).

### 2. Summary of Significant Accounting Policies

#### (a) Basis of preparation

This condensed consolidated interim financial report for the half-year reporting period ended 31 December 2017 has been prepared in accordance with the requirements of the *Corporations Act 2001*, applicable Australian Accounting Standards including AASB 134 *Interim Financial Reporting* and other mandatory professional reporting requirements.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim period.

#### (b) New accounting standards, amendments and interpretations

Accounting standards and interpretations which became effective for the first time for the 31 December 2017 half year report did not materially affect the entity's accounting policies or any of the amounts recognised in the financial statements.

Certain new accounting standards and amendments have been published that are not mandatory for 31 December 2017 reporting periods. The consolidated entity's assessment of the impact of relevant new standards and amendments are set out below:

##### i) AASB 15 *Revenue from Contracts with Customers*

- The Group has established a project team, which has initially focused on the larger revenue streams within each individual business unit and has undertaken a range of activities to identify those streams that have the highest potential risk of impact and/or will require a greater level of work effort to assess and/or quantify the financial impact of AASB 15. AASB 15's increased focuses on contracts with customers will require a greater understanding of customer contracts at a level of detail not previously required.
- Going forward, further work will be undertaken by management to review a representative sample of contracts, to gain a more detailed understanding of the contractual arrangements with customers in order to analyse the impact of the new standard by assessing these contracts in light of the requirements of AASB 15, which will include comparison to the Group's current accounting policies and practices, and identifying potential differences and potential changes to systems. The outcome of these assessments will determine the impact of the changes for both business and financial reporting.
- The standard will be applied for the first time for the Group for the year ended 30 June 2019 and the Group is still in the process of assessing which transition method it will adopt. This decision will depend in part upon the completion of, and impact arising from, the evaluation of our revenue arrangements.

## Notes to the consolidated financial statements For the half-year ended 31 December 2017

### 2. Summary of Significant Accounting Policies (cont.)

#### ii) AASB 16 Leases

- The Group has established a project team, which has focused on the identification of the provisions of the standard which will most impact the Group.
- Going forward, this impact analysis will continue as well as a detailed review of contracts and financial reporting impacts and related changes to systems. The outcome of these assessments will determine the impact of the changes.
- The Group is considering the available options for transition. The standard will be applied for the first time for the Group for the year ended 30 June 2020.

#### (c) Interim Reporting

The half-year financial report does not include all notes of the type normally included within the Annual Financial Report.

Accordingly, the financial report should be read in conjunction with the Annual Financial Report of Macquarie Telecom Group Limited as at 30 June 2017. It is also recommended that the half-year financial report be considered together with any public announcements made by Macquarie Telecom Group Limited during the half-year ended 31 December 2017 in accordance with the continuous disclosure obligations arising under the *Corporations Act 2001*.

#### (d) Significant accounting judgements, estimates and assumptions

In preparing the financial report, the consolidated entity is required to make estimates and assumptions about the carrying values of assets and liabilities. The key estimates and accounting judgements for Macquarie Telecom relate to the determination of the useful lives of non-current assets and the estimation uncertainty associated with determining the recoverable amount of non-current assets. These estimates and assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis.

##### *Recoverable amount of non-current assets*

The major sources of estimation uncertainty in assessing the recoverable amount of non-current assets are judgements relating to future sales order growth and pricing and the utilisation of data centre capacity, the Group's ability to manage operating and capital expenditure and the cost of capital. Should the future performance of the Group differ from these estimations the assessment of the recoverable amount of non-current assets would be different and may impact the impairment testing result.
